- Diploma In Information Technology

SKILLS

- Project Management
- Teamwork
- Time Management
- Leadership
- Effective Communication
- Critical Thinking

PROFILE

Enthusiastic and self-motivated IT undergraduate with hands-on experience in software development, particularly in Java, Spring Boot, and full-stack projects. Strong foundation in database management, object-oriented programming, and web application development. Eager to contribute to real-world solutions through internships or entry-level opportunities, while continuing to expand technical and professional skills in dynamic team environments.

PROJECTS

AcadamiPlan   2025

3rd Year 1Semester Project

- Academic Scheduler is a comprehensive web application designed to streamline course enrollment, timetable management, and conflict resolution for educational institutions. The system features role-based access for Students, Lecturers, and Admins, with secure authentication, real-time notifications, and an intuitive UI for scheduling.

Kade Management System Project   2024

Self Project

- A full-stack web application developed using the MERN stack to streamline daily operations of a small retail shop. The system manages product inventory, billing, customer details, and sales tracking, providing a user-friendly interface and efficient backend for shop owners to monitor and control their business activities.

TECHNICAL SKILLS

- React , Java, JavaScript, MongoDB, Angular, SQL, C Programming
